Subject: Dropped the ball...

WOW...has the DOJ really dropped the ball on this one. Your solutions to the Microsoft case are minimal and don't really solve the problem. Have you noticed when a Mac user goes to MSNBC.com, they can't run video because they don't have Windows??? There are MANY other situations that are similar. Windows is literally FORCED on the public. And they are hardly getting a slap on the hand. PLEASE rethink your "solutions"
